dapat melihat prosedur KRS.
Calon mahasiswa dapat
melihat prosedur KRS

Mana yang benar?

KONSEP DAN PRINSIP USECASE DIAGRAM: EXTEND

Extend is a directed relationship that specifies how and when the behavior defined in usually supplementary

(**optional**) extending use case can be inserted into the behavior defined in the **extended use case**. (UML 2.5)

KONSEP DAN PRINSIP ACTIVITY DIAGRAM: DECISION

Decision node is a **control node** that accepts tokens on one or two **incoming edges** and selects one **outgoing edge** from one or more outgoing flows.

The edges coming into and out of a decision node, other than the **decision input flow** (if any), must be either all **object flows** or all **control flows**.

Each token arriving at a decision node can traverse **only one** outgoing edge. Tokens are not duplicated. Each token offered by the incoming edge is offered to the outgoing edges. Which of the edges is actually traversed depends on the evaluation of the **guards** on the outgoing edges. The order in which guards are evaluated is **not defined**, i.e. we should not rely on any visual or text description order

UML 2.5

BERFIKIR KRITIS

Sistem akademik memberikan layanan agar
Mahasiswa dapat melihat KRS - nya dan jika
diperlukan dapat melihat prosedur KRS.
Calon mahasiswa dapat melihat prosedur KRS

KONSEP DAN PRINSIP SEQUENCE DIAGRAM ALT

Alternate

BERFIKIR KRITIS CLASS DIAGRAM

B

KONSEP DAN PRINSIP CLASS DIAGRAM

Class diagram is UML structure diagram which shows structure of the designed system at the level of classes and interfaces, shows their features, constraints and relationships - associations, generalizations, dependencies, etc. UML 2.5

PEKERJAAN INDIVIDU

- Buatlan pemodelan usecase, activity diagram, sequence diagram, dan class diagram dari hasil pekerjaan pada kuliah UI/UX
- Bandingkan dengan teman dalam satu kelompok
- Diskusikan jika terdapat perbedaan
- Kumpulkan di LMS

PEKERJAAN KELOMPOK

- Pilih hasil pemodelan individu menjadi tugas kelompok
- Perbaiki sesuai dengan hasil verifikasi ke kelompok lain atau dosen pengampu
- Kumpulkan di LMS, sebagai hasil kelompok (sertakan hasil pekerjaan kelompok pada matakuliah UI/UX)

KONSEP dan PRINSIP

[\[UML 2.5 FTF - Beta 1\]](#) moved use cases out of behavior modeling to UML **supplementary concepts**.
